

## QUALITY POLICY

*Our customers place their trust in us.*

*This is why we strive everyday to always offer them the maximum possible quality*

BEL Composite Ibérica S.L. believes that success depends on the supply of High-Quality products, packages and services that meet and exceed customer and consumer expectations of our products.

We are committed to continually enhancing the reputation of the vessels we manufacture, maintaining consumer confidence through the development and implementation of Quality, standards and practices.

As a result of our continuous pursuit of excellence and Quality in our vessels, BEL Composite Ibérica, S.L. is certified according to the Quality Management System internationally recognized ISO 9001:2015.

The responsibility to ensure the Quality of all our products is fundamental.

Quality is the responsibility of every BEL employee, in how they do their job, that has a direct influence on manufacturing, packaging, storage and the transport of products.

The foundation of BEL COMPOSITE IBÉRICA, S.L. are the following Quality principles:

- Manufacture and deliver products that meet the highest Quality standards.
- Ensure a sustainable Quality culture through the implementation, certification and continuous improvement of effective Quality management system.
- Build a Quality capability, mindset and culture through structured programmes that develop employees' competencies and technical skills, increase awareness and drive increasing levels of excellence across the organization.
- Provide greater competitive advantages.
- Improvement in the levels of customer satisfaction.
- Meet all statutory and regulatory requirements for Quality.
- Review continually Quality policies, standards and procedures.
- The annual business planning process includes Quality strategies to ensure that Quality remains an integral part of operations.
- Ensure that suppliers and contractors embrace the same Quality commitments and monitoring the materials and services they supply through audits and incoming goods inspections.
- Communicate Quality requirements to suppliers, contractors and customers.
