

BEL Sustainability Statement

At BEL Group Companies, we are committed to sustainability in every aspect of our operations. As a leading producer of reinforced fiberglass (GRP) equipment, we recognize the importance of preserving our planet for future generations. Our dedication to sustainability is ingrained in our business practices, from sourcing raw materials responsibly to reducing waste and emissions, throughout our manufacturing processes.

We strive to minimize our environmental footprint by continuously improving our energy efficiency, investing in renewable energy sources, and implementing innovative technologies that reduce resource consumption. Additionally, we prioritize the health and safety of our employees and the communities in which we operate, ensuring compliance with all relevant environmental, health and safety regulations and standards.

Through collaboration with our suppliers, customers, and stakeholders, we aim to foster a culture of sustainability throughout our supply chain and promote the adoption of eco-friendly practices across industries. By prioritizing sustainability, we not only contribute to the preservation of our planet but also create long-term value for our stakeholders and future generations."

This statement emphasizes BEL's commitment to sustainability, outlines its efforts to minimize environmental impact, ensures compliance with regulations, and highlights the importance of collaboration for promoting sustainability throughout the supply chain
